### **THE SCHEDULE**

## STATEMENT OF OBJECTS AND REASONS

The Aluminium Corporation of India Limited at Jaykay Nagar near Asansol (West Bengal) is engaged in the production of aluminium and aluminium fabricated products falling under the First Schedule to the Industries (Development and Regulation) Act, 1951. In September, 1973, the undertaking of the Company located at Jaykay Nagar near Asansol was closed due to financial and other difficulties. At the time of closure, the undertaking was employing about 2,500 persons.

2. Efforts were made from 1975 onwards by the Central Government and the Government of West Bengal to revive the undertaking, with a view to rehabilitate the workmen adversely affected by the closure and also for augmenting the supply of aluminium and aluminium fabricated products. However, the efforts did not succeed as the entire capital of the Company had been eroded by the outstanding liabilities and the management was unwilling to invest any funds. In the circumstances, the management of the undertaking of the Company located at Jaykay Nagar near Asansol was taken over on the 1st May, 1978 by the Central Government under Section 1SAA of the Industries (Development and Regulation) Act, 1951.

3. The undertaking has the facilities for production of primary metal and down-stream facilities for production of aluminium rolled products, extruded sections, foils

and conductors which are essential to the needs of the community, particularly in the industrial and power sectors. The working of the undertaking after the takeover of its management confirmed the possibility of re-starting the facilities and of making the operation viable provided adequate funds for modernisation were injected and the management structure was reorganised. The fabrication facilities at Asansol were re-commissioned in 1979. The performance of these facilities has not been very satisfactory and can be improved only by modernisation. For the improvement in the performance of the undertaking, further investment of public funds is considered necessary. Such investment is necessary for securing the proper utilisation of available facilities for production of aluminium and aluminium fabricated products which are essential to the needs of the community and also for securing the continued employment of the workmen employed in the said undertaking. It is felt that further investment of public funds, should be preceded by some arrangement which ensures continuity of management with the Government. It is, therefore, proposed to acquire the said undertaking.

4. The Bill seeks to achieve the above objects.
